

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Since placing our name on the "Privacy List" we have been able to have quite evenings at home. We used to receive in the neighborhood of 45 calls per month, this has been reduced to 2-3 calls a month. There is no reason for a utility that we pay for out of our own pockets to be used as a major source of irritation in our lives. We are very pleased with the way that things are right now and we DO NOT want any agency changing Indiana's Telephone Privacy Law!
